

# 15501 Ethernet Gateway

## OVERVIEW

The NotifEye™ Ethernet gateway allows your wireless sensors to communicate with the system without the need for a computer to be running. Simply plug this device into any open network port with internet connection and it will automatically connect with our online servers. You can easily configure your network, view collected sensor data and set alarms from any web-enabled browser. The system allows for complete configuration and customization at a sensor, local network, or client-wide level.

FEATURES	BENEFITS
<ul style="list-style-type: none"> <li>• Out-of-the-box setup</li> <li>• No computer required for operation</li> <li>• Power outage notification</li> <li>• Local status LEDs with transmission and online status indicators</li> <li>• Buffering allows 65,000 readings to be stored if internet connection is interrupted</li> </ul>	<ul style="list-style-type: none"> <li>• Self-installable, no technician or installation fees</li> <li>• Data can be accessed from anywhere via the internet</li> <li>• Alerts if the gateway isn't receiving power</li> <li>• Visual verification that the system is functioning properly</li> <li>• Prevents data loss</li> </ul>
<p><b>Specifications:</b></p> <ul style="list-style-type: none"> <li>• Dimensions: (L x W x H) 5.5" x 4.0" x 1.3" (140 mm x 102 mm x 35 mm)</li> <li>• Communication: 900 MHz</li> <li>• Antenna: 7.25" (184 mm) SMA connector</li> <li>• Power: AC or power-over-ethernet</li> <li>• 1-year warranty</li> </ul>	<p><b>Minimum System Requirements:</b></p> <ul style="list-style-type: none"> <li>• Internet Access via an Ethernet Port</li> <li>• PC / MAC Compatible</li> </ul>
