

15500 USB Gateway

OVERVIEW

The NotifEye™ USB gateway allows your wireless sensors to communicate with the online monitoring and notification system through your local PC. Simply install the USB driver and plug the gateway into an available USB port on a Microsoft Windows PC. Then install the NotifEye Gateway application onto the PC to pass sensor data to the online system. You can easily configure your network, view collected sensor data and set alarms from any web-enabled browser on a PC, MAC, smartphone, tablet, etc. The system allows for complete configuration and customization at a sensor, local network, or client-wide level.
